Subject: RE: SB-88 Annual Report Resubmittal

Anna,

Thank you for your email of March 7, 2022, that included a revision of The Fresh Water Trust (TFT) Annual Report for SB 88 Alternative Compliance Plan (ACP) for Measuring and Reporting on the Diversion of Water in the Sacramento-San Joaquin Delta. We appreciate the continued efforts of TFT in collaboration with The Nature Conservancy (TNC) in the comparison of a Measurement Method and the comparison to Open ET to attain compliance with the diversion measurement regulation (23 CCR §933) implementing Water Code §1840 in specific areas in the Northern Delta region.

The Delta Watermaster has delegated to me his authority to authorize extensions of time to comply with the regulations implementing SB 88. Pursuant to the provisions of 23 CCR §936, TFT's request for Additional Time to attain compliance is hereby granted. This extension will expire on September 30, 2022, to coincide with the end of the current water year. If it deems necessary for TFT to make another request for Additional Time to fully implement the transition from CUP+ to Open ET, TFT should file another request, including a progress report, no later than July 31, 2022.

We are deeply appreciative of TFT's continued cooperation with our Office to meet the objectives of Water Code §1840, notwithstanding the unforeseen challenges in the Delta. Please continue to keep us informed of your progress regarding the transition from CUP+ to Open ET, any new unforeseen circumstances that TFT may encounter in 2022, and to continue your participation in the Delta Measurement Experimentation Consortium.

Thank You,

John Collins
